# BIRD WATCHING

## Definition

Tourist travel for the specific purpose of observing wild birds, otherwise known as *avitourism* or *birding*. People at all levels of fitness and ornithological knowledge can participate. Many countries have thriving bird watching societies, which promote and sponsor trips to destinations where there is an abundance of bird life.

## Estimate of Global Market Size

An estimated 3 million international trips are taken each year for the main purpose of bird watching. However, there is considerably more interest at a domestic level. Around 20 million US citizens took bird watching trips in 2007, of which most were within the country.

It should be noted that bird watching is often a secondary purpose of trip. For example, visitors to game reserves are often attracted by large mammals, but also enjoy exotic bird life at the same time.

In the USA, birdwatchers are estimated to spend over $2.5 billion each year. In the UK, expenditure is estimated at $500 million each year.

## Potential for Growth

Bird watching is reported as being the fastest growing outdoor activity in America with 51.3 million Americans claiming to watch birds (US Fish and Wildlife Service). The Royal Society for the Protection of Birds (RSPB) in the UK has membership of over 1 million people.

There can be no doubt that bird watching has the potential to be a significant tourism market segment. However it will always remain a niche market, although growth is expected to be strong over the next 10 years.

## Brief Profile of Consumers

Bird watchers are usually highly educated, affluent, interested in wildlife, keen to see as many species as possible, and travel to areas where bird life is abundant. They are roughly evenly split between women and men, and are almost exclusively white. Almost 75% of US bird watchers have achieved degree level education or better.

For many bird watching tourists, the primary objective is to see as many species as possible in the most cost-effective manner. Bird watching operators report that clients usually travel by themselves or with one other person (usually spouse or partner). Large groups of bird watchers may travel together though the incidence of these
groups is somewhat rare.

The US and Australian markets seem to be dominated by the 40-49 year olds, however it is suggested that the average age is slightly older than this. Most international bird watchers are likely to be members of their local bird watching clubs.

**Main Source Markets**

- United States
- United Kingdom
- Continental Europe (in particular Germany, Netherlands, France)
- Australia

**Main Competing Destinations**

Due to the migratory instincts of the indigenous American birds, the main competing birding destinations for US consumers are Mexico and Colombia, with secondary destinations being Venezuela, Costa Rica and Panama.

In terms of international places of interest, the main bird watching destinations for European consumers are situated in Africa, with Kenya, Tanzania, Uganda, Botswana and Namibia being the leading destinations. Other key destinations include New Zealand, Indonesia, Papua New Guinea, Brazil and Colombia while all countries on migratory routes are looking to develop this type of tourism e.g. India. Ecuador and Galapagos Islands tend to attract a significant number of organised bird watching tours.

One US company suggests the following top 10 bird watching destinations:

1. Panama: Canopy Tower
2. Belize: Chan Chich Lodge
3. Venezuela Ranches: Hato Pinero and Hato Cedral, or Brazil: Pantanal
4. Antarctica
5. Kenya
6. Namibia and Botswana
7. Australia and Papua New Guinea
8. Northern India and Bhutan
9. Manu Wildlife Centre in Peru, or Napo Wildlife Centre in Ecuador
10. US: the Texas Coast

**Key Tour Operators**

**Victor Emanuel Nature Tours - Vent Bird**
United States

Key Points for Marketing and Distribution

The media, in particular television utilising increasingly ingenious filming techniques for the coverage of bird life, have generated considerable interest in recent years. In the UK, “The Life of Birds” television series attracted 9 million viewers. This has in turn led to an increased circulation of bird publications that offer options for marketing and distribution of travel products, such as:

- Bird Watchers Digest
  http://www.birdwatchersdigest.com

- Birder’s World
  http://www.birdersworld.com

- Wild Bird Magazine
  http://www.wildbirdmagazine.com

- Birds and Blooms
  http://www.birdsandblooms.com

- Europe’s Largest Birding website
  http://www.fatbirder.com

- Surfbirds – International birding website, featuring a guide to tour operators and a member’s blog.
  http://www.surfbirds.com

Targeted marketing can be undertaken using these journals and through direct mail to memberships of bird watching clubs and associations.
